Equities market closed the day's trading session in green zone as the NSE All Share Index and Market Capitalisation appreciated by 0.61% to close at 38,808.01 and ₦20.31 trillion respectively. The Year-to-Date (YtD) and the Quarter-to-Date (QtD) returns stand at -3.63% and -0.61%, while the Month-to-Date (MtD) and Week-to-Date returns stand at -0.61% and -0.15% respectively.

The market breadth (gainers/losers) of 2.09x for the day indicates that the number of buyers outpaced the number of sellers in the market today. At the end of the day's trading, 23 stocks advanced as 11 stocks declined; CHAMS (+10.00%), UAC-PROP (+9.72%) and GUINNESS (+9.26%) led the gainers chart while JAPPAULGOLD (-10.00%), STERLNBANK (-9.76%) and FCMB (-8.90%) led the losers chart for the day.

The day's trading activities by volume was led by FIDELITYBK (46.15million), FBNH (33.99million) and GUARANTY (33.47million) while the activity by value was led by GUARANTY (₦0.97billion), FBNH (₦0.26billion) and STANBIC (₦0.23billion).

Outlook: NSE market capitalisation increases by ₦123.5 trillion. With new opportunities in the fixed-income space, especially in sovereign issues with almost zero default risk, there has been portfolio adjustments in recent weeks by equities owners, despite the seasons of dividend payments by listed companies. Notwithstanding, this is very likely to create entry opportunities for investors. We therefore advise our clients not to engage in panic selling, as we expect equity market to maintain positive growth due to the expectation of dividend payment in the year.

PACAM BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.

Unit Of Sale: Minimum of 50,000 units and multiples of 10,000 units thereafter.
