BALANCED FUND

Investment takes different forms. In investing you need to consider a few basic things;

- a) What opportunities exist in the market
- b) How much capital to commit into investment.
- c) Transaction cost
- d) Skill and time to monitor the investment
- e) How to exit the investment

Many people often ask the question why a particular stock made more than 390% last year, and think 'if I had put my money in there my investment would have quadrupled'. While that is true, have you considered investing in some stock that delivers a negative return of about 65%? - That could be catastrophic. You wouldn't know on face value what stock would likely do well at the end of the day. This is why diversification is essential, so that as your portfolio risk is spread out.

It does not require a huge amount to build a well-diversified portfolio. One can benefit from portfolio diversification, professional management, competitive returns and broad investment opportunities simply by investing in a vehicle such as a Mutual Fund. Buying into a fund provides great benefit to investors with limited knowledge, time or money, while expanding the opportunities available to the investor.

A Balanced Fund is a type of collective investment scheme that invests in multiple asset classes giving you an opportunity to benefit from a broader range of investment securities. Let me introduce PACAM Balanced Fund sponsored by the PAC Asset Management LTD.

The PACAM Fund is an Open-ended Balanced Fund that will be invested in a mix of instruments across four asset classes and target locations are as follow ; Equity (up to 40%), Bonds (up to 15%), Money Market (up to 15%) and Real Estate (up to 30%.) The Fund seeks to achieve an efficient balance between capital appreciation and income for investors with modest risk appetite.
